

# Ecological Experiences & Climate Jobs

REAP believes we need a **network of climate centers** to **build community resilience** and the skills to **deploy Nature-as-Infrastructure** for **climate change mitigation**. We are amplifying industry sectors and organizations who are transitioning to this work.

**We Serve:**  
 Community Building  
 Workforce Development  
 Economic Development

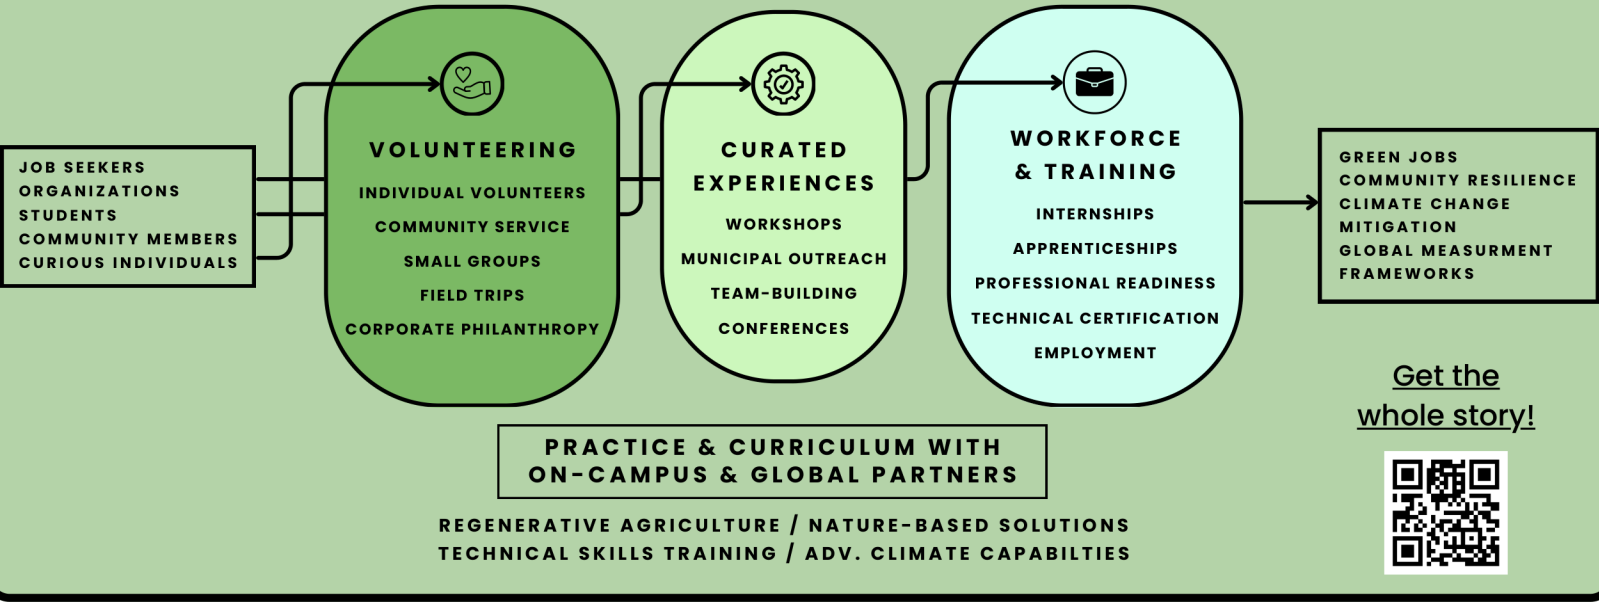

**We Strive:** Nature-Positive Solutions can create 395 million jobs and \$10 trillion in opportunity by 2030.\*

The premise is simple:

- **Enhance natural systems** whose scale and purpose is to support life on Earth.
- **Accelerate the most economically viable nature-based solutions.**
- **Provide space** on our campuses to practice keepers, curriculum providers, and businesses that further this mission.
- **Help municipalities** achieve their climate objectives.
- **Support critical workforce development initiatives.**

## Featured Partners & Endorsements

**SENATOR NANCY SKINNER**  
 CALIFORNIA STATE SENATE

**CONGRESSWOMAN BARBARA LEE**  
 U.S. HOUSE OF REPRESENTATIVES

**ASSEMBLYMEMBER MIA BONTA**  
 CALIFORNIA STATE ASSEMBLY

# From play and discovery, all the way through training and job placement.

REAP offers volunteering and curated experiences, open to all. REAP's current workforce development emphasizes serving vulnerable populations, including veterans, seniors, folks with disabilities & special needs, and marginalized & underserved communities.

## We are 35% done building our first half-mile-long campus in Alameda, California.

All spaces on campus tie out to an ecological benefit and job training.
